CONTENTS

Volume 23, Issues 1–6

International Journal of
MATHEMATICAL EDUCATION IN SCIENCE AND TECHNOLOGY

Issue No. 1, JANUARY

A project in algebra—fractions and operators. J. E. PHYTHIAN 1

Misconceptions in data manipulations. J. B. SZTRAJMAN 13

Variations and extensions of Proll's integer linear programming formulation techniques for the graph partitioning problem. G. GUNAWARDANE ... 19

Beads, bags and Bayes. O. D. ANDERSON and S. B. PROVOST 25

Students' mental prototypes for functions and graphs. D. TALL and MDNOR BAKAR 39

The differential equation of the deflection curve. C. H. F. BULTE 51

Mathematics and the national curriculum: primary teachers' attitudes. R. STOESSIGER and P. ERNEST 65

What are non-integer dimension numbers and what are they for? H. ZEITLER 75

An analysis of a garbage collection operation. R. EGUDO 89

Early modern concepts of number and algebra and some connections with those of science. M. SELTMAN 97

Teaching the shooting method for the solution of boundary value problems. W. B. FU 111

Mathematics in sport I. D. S. F. CROTHERS 117

Classroom notes 127

Issue No. 2, MARCH

Investigations on cubic polynomials. S. BEJI 167

Student perceptions of projects in learning calculus. M. R. CONLEY, C. L. STEUSSY, M. S. COHEN, E. D. GAUGHAN, R. A. KNOEBEL, D. S. KURTZ and D. J. PENGELLEY 175

The 6-3-3-4 education system and tertiary mathematics curriculum—A case for matching the objectives in senior secondary mathematics curriculum with the preparatory stance of the teacher. D. O. IHEJIETO 193

How many sides has a polygon, on average? M. J. GLENCROSS and A. V. BOYD 203

Lexical knowledge and mathematics education in science and technology in Papua New Guinea. S. MARSHALL, M. GILMOUR and D. LEWIS ... 211

A combined-methodologies approach to problem solving in management science courses. N. B. MARKS and R. H. MCCLURE 219

Mathematics in sport: II. D. S. F. CROTHERS 225

A hypergeometric formulation of Fermat's Last Theorem. A. R. MILLER, E. VEGH and W. P. WARDLAW 235

Overgeneralization in mathematics and science: the effect of external similarity. R. STAVY and D. TIROSH 239

Pre-Robinson approach to the theory of infinitesimals. D. SINGH and S. K. SINGH 249

Bayes' theorem: some examples in computer-aided medical diagnosis. H. SAHAI 257

Effect of instruction based on a validated learning hierarchy in mathematics on student learning outcomes. O. A. OYEDEJI 267

Quaternions and the art of navigation. E. H. FENWICK 273

Existence and uniqueness of the solution of a non-linear integro-differential equation. K. BALACHANDRAN and A. ANGURAJ 281

Problems in training secondary mathematics teachers: the Greek experience. C. TOUMASIS 287

Classroom notes 301

Obituary. Professor Rolph Schwarzenberger 337

Issue No. 3, MAY

Induction, recursion, and the Towers of Hanoi. O. D. ANDERSON 339

Flow past a lifting arc. R. K. BERA 345

Teaching a calculus-based introductory biostatistics course to graduate students in health sciences. H. SAHAI 351

Another look at centroids of quadrilaterals. C. TOUMASIS 359

Some n-dimensional geometry. G. DERISE 371

Properties of a triangle with three concurrent Cevian lines. M. K. F. WONG 381

Normalized finite non-homogeneous chains and applications. CHENG-CHI HUANG 387

Uses of computers in calculus: suggestions drawn from the experiences of C&M. B. A. HASSAN and E. HJELMLET 399

On the geometrization of the Peano curve and the arithmetization of the Hilbert curve. H. SAGAN 403

Using PC-Matlab in the teaching of linear algebra. A. CHOLA NYONDO ... 413

A linear algebra course with PC-MATLAB: some experiences. J. G. M. M. SMITS and J. J. M. RIJPKEMA 421

Remarks on approximations for linear dynamical systems. J. K. KNOWLES 429

Teaching dynamic programming using APL. D. L. BRICKER and E. Y. H. LIN 433

Themes in the evolution of number systems. S. AVITAL and I. KLEINER ... 445

On the composition of Riemann integrable functions. J. KLIPPERT ... 463

A Markov chain model in teachers' decision making. S. C. PERDIKARIS ... 473

Theory of errors: a brief introduction. H. SAHAI 479

Classroom notes 487

Issue No. 4, JULY

The magic of generalization. C. TOUMASIS 509

Introducing limits at the undergraduate level. L. D. KUDRYAVTSEV ... 517

The high-order use of the trapezoidal rule in numerical quadrature. G. A. EVANS 525

Using a simplified gradient method to solve a system of linear equations. J. MALONEY and YI-HSIN LIU 537

A problem to foster critical thinking in mathematics. K. M. SHANNON and H. W. AUSTIN 543

Some properties of Catalan's constant G. S. YANG 549

The inverse function: Prospective teachers' use of 'undoing'. R. EVEN ... 557

Continued fractions for $\sqrt{d}$ of a given period. L. SHORT 563

Modelling or muddling through? Mathematics for engineering undergraduates. L. R. MUSTOE 575

Analysis of variance with additional observations from unidentified populations. R. RADHAKRISHNAN and D. R. ROBINSON 583

Chaos or co-ordination: organizational aspects of tutoring large classes. N. M. SPENCER 589

Mathematical discussion and mathematical understanding: some episodes with 'Microelectronics for all'. R. L. E. SCHWARZENBERGER 595

A fair estimation of marks. K. C. CHAE 603

Classroom notes 611

Issue No. 5, SEPTEMBER

Use of the compiler as a mathematics teaching resource. D. DUFFY and J. O'DONOGHUE 637

Calculation of a winning chance in a game with conditional probability: the case of volleyball. P. I. YU and K. C. CHAE 651

Assessment for an advanced mathematics coursework syllabus. N. PRICE 657

Reflection of water waves by a nearly vertical wall. B. N. MANDAL and S. K. KAR 665

Correlation analysis in calculus. T. C. T. KOTIAH 671

Mathematics: history, philosophy and applications to science. M. C. K. AGHADIUNO 683

An intuitive approach to variation of parameters. R. D. Driver. L. F. Martins and I. W. Rodrigues 691

Some generalizations of the Wallis product. L. Short 695

Metric-preserving mappings. H. Bowman and R. J. Dalpatadu 709

Seeing the point of mathematics. C. Ormell 715

Algorithms for computational precision. E. Katz, R. H. Marty and S. D. Silliman. 723

An evaluation of computer-assisted learning in mathematics. D. M. Mackie 731

Complex stochastic averaging approach to a two-state predator system. G. P. Samanta 739

Effects of using calculators on mathematical achievement for remedial seventh grade students. J. P. Fisher and L. J. Stephens 745

What Irish pupils say about mathematics. J. English, J. O'Donoghue and A. C. Bajpai 749

Convergence of matrix powers. S. H. Friedberg and A. J. Insel 765

Some sequencies arising from continued fraction expansions. L. Short ... 771

Classroom notes 785

Issue No. 6, November

The use of computer algebra in the harmonic analysis of phase controlled waveforms. A. D. Rough and J. Richardson 813

The billiard problem. W. Gander and D. Gruntz 825

Showing complex dynamics with PCs: a repertory of interesting cases. J. M. Giron-Sierra and E. Vazquez-Suances 831

Existence of a common fixed point for a family of mappings of non-expansive type on a metric space. I. Galin'a 861

The role of the Stella software package in simulation and modelling. G. R. Lindfield 865

Explorations in school calculus: a case study. C. Toumasis 881

Classroom notes 895
